**LEARNING OBJECTIVES**

- ◇ Provide evidence-based CME courses, equipping family physicians and primary care providers with information to make knowledge-based decisions in multiple practice facets including clinical, practice management, and policy.
- ◇ Inform family physicians and primary care providers of practical approaches to transforming practices based on the concept of a relationship focused patient-centered medical home.
- ◇ Educate family physicians and primary care providers in the current evidence-based management of medical conditions encountered by Family Medicine specialists.
- ◇ Support family physicians' achievements of Maintenance of Certification requirements by facilitating ABFM Self-Assessment Modules.
- ◇ Empower family physicians and primary care providers to be agents of change in their own communities, dealing with the public and policy makers at any level.
- ◇ Foster opportunities for high-quality education and interaction between medical students, Family Medicine residents, mid-level providers and family physicians ensuring a healthy pipeline of physicians for the future.
- ◇ Promote healthy self-care behaviors in family physicians.
- ◇ Educate members about the "Quadruple Aim" -- improving population health, enhancing the patient experience of care, reducing or controlling the cost of care, and improving provider satisfaction.

*Individual session objectives are listed in the syllabus*
